Servizio Politiche Ambientali

The Gantt chart displays a timeline from Week 37 to Week 88. The chart is organized into weeks, with each week represented by a row of cells. The first column of each row contains the week number (e.g., 37, 38, 39, 40, 41, 42 for Week 37). The subsequent columns represent days within each week. The chart uses a color-coded system where most cells are yellow, indicating available time or a baseline. Several horizontal blue bars represent specific tasks or activities. One prominent blue bar, labeled 'Z1', spans from Week 41 to Week 88. Other blue bars are located in the first few weeks, with labels such as 'Z1' appearing multiple times to identify them. Arrows point to some of these blue bars, likely indicating dependencies or key milestones.
